Power Up with zenOn

The HMI/SCADA automation solution renowned for reliable operation, flexible integration and high-performance communication via DNP3, IEC 60870 and IEC 61850.

Power Up with zenOn® Award-Winning Automation Software

zenOn is an award-winning* automation software for HMI (Human Machine Interfaces), SCADA (Supervisory Control And Data Acquisition) and DCS (Distributed Control Systems). Its special **Energy Edition** is tailored to the needs of electric utilities and the energy sector.

zenOn gives you control over multiple plants at multiple geographical locations, thanks to its unique network technology, remote control, and remote maintenance functions.

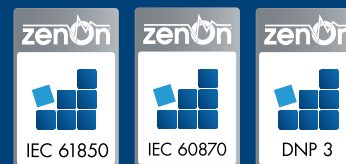

zenOn is safe and efficient. Seamless, built-in redundancy protects against data loss, ensures data integrity and delivers maximum uptime.

zenOn secures your data with its intelligent solutions for data recording and analysis, including such important functions as integrated alarm and event administration and, of course, secure access control.

zenOn supports over 250 drivers and gateways to give you high-quality, multifaceted connectivity through all major protocols -- including DNP3, IEC 60870 and IEC 61850.

zenOn is graphically superior with its multi-monitor support, worldviews with zooming and de-cluttering, topology, free filters and multimedia integration.

zenOn works with all Windows and web-based systems, from Windows CE to Windows 2000/XP/Server 2003 and Windows Vista.

* 2006 Frost & Sullivan Product Innovation of the Year Award
zenOn® is a registered trademark of Ing. Punzenberger COPA-DATA GmbH

The Power of zenOn

Here are a few of the many features that make **zenOn Energy Edition** a powerful choice for your energy automation needs.

- Energy Management System
- Topology
- Command definitions and interlocking
- Seamless redundancy
- Integrated alarm management and chronological events list
- Archive server and detailed reporting, trending, messaging etc.
- Worldview graphics with zooming, panning and de-cluttering
- Multiple-monitor support
- Industrial Maintenance Manager
- DNP3, IEC 60870 and IEC 61850 plus support for more than 250 drivers
- Secure access control and user management
- Windows based and Web-browser compatible
- STRATON: Integrated solution based on IEC 61131-3
